On a separate piece of paper, answer the following questions following appropriate response to literature guidelines:

1. The dark haired girl is seen again. What is Winston's initial reaction at first sight of her? How does this change as soon as he sees her fall?
2. What do Julia and Winston's actions tell you about the unwritten "rules" of the party?
3. Describe the actual place the two finally are supposed to reach for a liaison. How is the description different from the description of the rest of London?
4. How does the tone of the novel change in chapter II? How does Winston change as he walks through the woods?
5. What type of girl is Julia? She identifies Winston as someone who does not "belong." What does she mean by this? How does she herself fit this description?
6. How does the party overshadow Julia and Winston's relationship?
7. What is "The Golden Country"?
